Concentrix Daksh is the outsourced business services division of SYNnex Corporation, USA. Concentrix helps its clients differentiate and improve business outsourcing through customer engagement, innovative technology, analytics etc.

Concentrix is the first BPO in India to get ISO 14001:2015 certification. Its environment policy addresses protection and prevention of environment, sustainability and conservation of natural resources. Ban on distribution of beverages in PET (plastic) bottles across offices in India saved 30,000 kg of plastic waste generation.

We take steps to integrate environmental considerations into our business activities and provide our employees with the awareness, skills, and knowledge necessary to encourage respect for our environment. Our facilities are constantly searching for new ways to reduce carbon emissions, cut down on energy usage, and improve energy efficiency. Some highlights of our efforts include:

- ISO 14001: 2015 Certifications in Environmental Management System which includes Waste Management, Water Consumption (Fremont, CA, United States), and Energy Conservation
- Our Conflict Minerals policy, posted on our website, which addresses our supply chain expectations for the components in the products that we manufacture or integrate
- Access for our Technology Solutions North America resellers to a wide variety of green-designated products and services
- Installed solar panels and installed electric car stations at certain US office locations and a commuter benefit program at our headquarters location
- A transportation network for our Concentrix India employees that provides an efficient and cost-conscious method for our employees to travel to and from our work facilities
- Datacentre and facility temperature standardization across various facilities to conserve energy
- An electronic waste disposal program (Concentrix Latin America, Greenville, SC), plastic recycling efforts to raise money for charity (Concentrix Uruguay), environmental and recycling education program that teaches employees how to recycle and reuse materials (Concentrix India), water reduction and training program (Concentrix India), clean athon drives (Concentrix India)
- SYNnex GoGreen program to raise employee awareness on environmental issues to help contribute to a better, healthier planet
- Water dispensers onsite where employees can refill their water bottles, water coolers in break rooms, and reusable water bottles available to interested staff in certain locations
